

Business Requirements Document (BRD)

FinTech Digital Lending & Payments Platform

Project Name: FinFlow

Prepared For: Sample FinTech Client

Prepared By: Business Analysis Team

Version: 1.0

Date: May 12, 2026

1. Executive Summary

The purpose of this project is to develop a comprehensive fintech platform that enables users to:

- Create and manage digital accounts
- Transfer money securely
- Apply for personal and business loans
- Track transactions and repayments
- Perform KYC verification
- Access analytics and spending insights
- Integrate with banking systems and payment gateways

The platform should support both web and mobile applications with scalable architecture, strong security, compliance support, and high transaction reliability.

2. Business Objectives

Primary Goals

- Digitize lending and payment operations
- Reduce manual loan processing time
- Increase customer onboarding speed
- Enable secure digital transactions
- Improve customer engagement through analytics
- Support scalability for future financial products

Success Metrics

KPI	Target
User onboarding time	< 5 minutes
Loan approval time	< 15 minutes
Payment success rate	> 99%
System uptime	99.9%
KYC verification success	> 95%
Mobile app rating	4.5+

3. Scope of Project

In Scope

Customer Features

- User registration/login
- Multi-factor authentication
- KYC verification

- Wallet management
- Bank account linking
- Money transfer
- Loan application
- EMI tracking
- Transaction history
- Notifications
- Expense analytics
- Customer support chat

Admin Features

- User management
- KYC approval/rejection
- Loan approval workflow
- Fraud monitoring
- Transaction monitoring
- Analytics dashboard
- Report generation
- Audit logs
- Role management

Technical Features

- API integrations

- Payment gateway integration
 - Credit score API integration
 - Banking APIs
 - Push notifications
 - Email/SMS services
 - Cloud deployment
 - Security monitoring
-

Out of Scope

- Cryptocurrency trading
 - International remittance (Phase 1)
 - Stock trading
 - Insurance marketplace
 - Wealth management
-

4. Stakeholders

Stakeholder	Role
Client/Product Owner	Business decisions
Business Analyst	Requirement gathering
Project Manager	Delivery management
UI/UX Team	Product design
Backend Team	API & database development
Frontend Team	Web application
Mobile Team	Android/iOS apps

Stakeholder	Role
QA Team	Testing
DevOps Team	Infrastructure
Compliance Team	Regulatory compliance

5. User Roles

Role	Permissions
Customer	Payments, loans, account management
Admin	Platform management
Finance Officer	Loan approval
Support Agent	Customer issue handling
Compliance Officer	KYC & fraud review
Super Admin	Full access

6. Functional Requirements

6.1 User Authentication Module

Features

- User registration
- Login/logout
- OTP verification
- Password reset
- Biometric login
- MFA authentication

Requirements

ID	Requirement
FR-AUTH-001	Users shall register using mobile/email
FR-AUTH-002	OTP verification shall be mandatory
FR-AUTH-003	Password must meet security rules
FR-AUTH-004	MFA should be enabled
FR-AUTH-005	Session timeout after inactivity

6.2 KYC Verification Module

Features

- PAN verification
- Aadhaar verification
- Document upload
- Face matching
- Address verification

Requirements

ID	Requirement
FR-KYC-001	Users must upload government ID
FR-KYC-002	OCR extraction should read documents
FR-KYC-003	Admin can approve/reject KYC
FR-KYC-004	KYC status notifications required

6.3 Wallet & Payments Module

Features

- Wallet balance
- Add money
- Bank transfer
- UPI payments
- QR payments
- Beneficiary management

Requirements

ID	Requirement
FR-PAY-001	Users can transfer funds instantly
FR-PAY-002	Transaction history must be stored
FR-PAY-003	Failed transactions must auto-reconcile
FR-PAY-004	Payment receipts downloadable
FR-PAY-005	Daily transfer limits configurable

6.4 Loan Management Module

Features

- Loan application
- Eligibility checks
- Credit scoring
- Loan approval
- EMI calculator

- Repayment tracking

Requirements

ID	Requirement
FR-LOAN-001	Users can apply for loans digitally
FR-LOAN-002	Credit score APIs must integrate
FR-LOAN-003	Loan approval workflow configurable
FR-LOAN-004	EMI schedules auto-generated
FR-LOAN-005	Repayment reminders automated

6.5 Notifications Module

Features

- SMS alerts
- Email alerts
- Push notifications
- Transaction alerts
- EMI reminders

Requirements

ID	Requirement
FR-NOTIF-001	Users receive real-time notifications
FR-NOTIF-002	Notification templates manageable
FR-NOTIF-003	Failed notification retries required

6.6 Analytics & Reporting Module

Features

- Spending analysis
- Revenue reports
- Loan analytics
- Fraud reports
- User growth metrics

Requirements

ID	Requirement
FR-ANALYTICS-001	Admin dashboard should support charts
FR-ANALYTICS-002	Export reports in PDF/Excel
FR-ANALYTICS-003	Data refresh every 5 minutes

7. Non-Functional Requirements

Category	Requirement
Performance	API response < 2 sec
Availability	99.9% uptime
Scalability	1 million users support
Security	AES-256 encryption
Compliance	PCI-DSS compliant
Backup	Daily automated backup
Logging	Centralized logs required
Monitoring	Real-time monitoring

Category	Requirement
Accessibility	WCAG compliant
Localization	Multi-language support

8. Security Requirements

- End-to-end encryption
 - Tokenized payment processing
 - Secure API gateway
 - OAuth 2.0 authentication
 - RBAC implementation
 - Fraud detection engine
 - IP/device tracking
 - Audit trails
 - Data masking
 - Secure password hashing
-

9. Compliance Requirements

- RBI compliance
- PCI DSS
- GDPR (if international users)
- AML compliance
- KYC regulations

- Data privacy policies

10. Third-Party Integrations

Integration	Purpose
Razorpay/Stripe	Payment processing
Twilio	SMS notifications
Firebase	Push notifications
Plaid/Yodlee	Banking APIs
Experian/CIBIL	Credit score checks
AWS/Azure	Cloud hosting
SendGrid	Email services

11. Suggested Tech Stack

Frontend

- React.js
- Next.js
- Tailwind CSS

Backend

- Node.js
- NestJS / Express

Mobile

- Flutter / React Native

Database

- PostgreSQL
- MongoDB
- Redis

Cloud

- AWS
- Docker
- Kubernetes

DevOps

- Jenkins
- GitHub Actions
- Terraform

12. API Requirements

Example APIs

API	Method	Purpose
/auth/register	POST	User registration
/auth/login	POST	User login
/wallet/transfer	POST	Money transfer
/loan/apply	POST	Loan application
/transactions	GET	Fetch history

13. User Journey

Customer Flow

1. Register account
 2. Verify OTP
 3. Complete KYC
 4. Link bank account
 5. Add wallet funds
 6. Transfer money OR apply for loan
 7. Track transactions/EMIs
 8. Receive notifications
-

14. Admin Workflow

1. Review KYC requests
 2. Monitor suspicious transactions
 3. Approve/reject loans
 4. Generate reports
 5. Manage customer complaints
-

15. Project Phases

Phase	Duration
Requirement Gathering	2 weeks
UI/UX Design	3 weeks
Backend Development	8 weeks
Frontend Development	6 weeks
Mobile Development	6 weeks
QA Testing	4 weeks
UAT	2 weeks
Deployment	1 week

16. Project Deliverables

- BRD document
 - SRS document
 - UI/UX wireframes
 - API documentation
 - Web application
 - Mobile applications
 - Admin dashboard
 - Test cases
 - Deployment setup
 - Production release
-

17. Risks & Mitigation

Risk	Mitigation
Regulatory changes	Compliance monitoring
Payment failures	Retry mechanisms
Fraud attacks	Fraud detection system
Data breaches	Security audits
High server load	Auto scaling

18. Assumptions

- Client provides regulatory approvals
 - APIs from banking partners are available
 - Cloud infrastructure budget approved
 - Third-party vendors available on time
-

19. Constraints

- Strict financial regulations
 - High security requirements
 - Limited launch timeline
 - Dependency on banking APIs
-

20. Future Enhancements

- AI-based loan recommendations
- Crypto wallet integration

- BNPL features
 - Investment platform
 - International transfers
 - Voice banking
 - AI fraud detection
 - Chatbot assistant
-

21. Acceptance Criteria

The project will be considered successful when:

- All critical modules are functional
 - Security audit passes
 - Compliance requirements met
 - UAT approval completed
 - Production deployment stable
 - Performance benchmarks achieved
-

22. Appendix

Abbreviations

Term	Meaning
KYC	Know Your Customer
AML	Anti-Money Laundering
EMI	Equated Monthly Installment

Term	Meaning
MFA	Multi-Factor Authentication
API	Application Programming Interface
UAT	User Acceptance Testing

23. Sample Product Backlog / Tasks

Authentication Tasks

- Create login API
- Implement OTP service
- Add JWT authentication
- Create password reset flow
- Setup MFA

Wallet Tasks

- Build transaction engine
- Add payment gateway integration
- Create reconciliation service
- Build QR payment support

Loan Tasks

- Integrate credit bureau APIs
- Build loan eligibility engine
- EMI calculation service

- Loan repayment scheduler

DevOps Tasks

- Setup CI/CD
- Configure Kubernetes
- Setup monitoring dashboards
- Configure logging systems

QA Tasks

- API testing
 - Security testing
 - Load testing
 - Regression testing
-

24. Sample Database Entities

- Users
- KYC Documents
- Wallets
- Transactions
- Loans
- EMI Schedules
- Notifications

- Audit Logs
 - Devices
 - Support Tickets
-

25. Approval Sign-Off

Name	Role	Signature
Product Owner	Client	Pending
Business Analyst	BA Team	Pending
Technical Lead	Engineering	Pending
Compliance Head	Compliance	Pending
